

KATHY SINNOTT MEP
MEMBER OF THE EUROPEAN PARLIAMENT FOR MUNSTER

12 May 2006

Dear Mr Nijssen,

Many thanks for attending the meeting recently at the European Parliament to discuss Biomedical Intervention in Autism and related ASD Autistic Spectrum Disorders.

I was certainly very interested to hear all you had to inform us on the breakthroughs made by your company in the field. In addition I was most fascinated by the many hours we spent together and the amount of information we covered.

As discussed we are ready to give our whole hearted support to a wider trial of children in Ireland and would endeavour to make aware other Autism Groups and Organisations within the European Community about the Three Wells approach for recovery.

Most encouraging is the prospect of setting up dedicated treatment centres throughout the EU starting in your own country the Netherlands. Here the children will be able to participate in the treatment protocol and all other related beneficial therapies to enable catch up to neuro typical developmental ranges after the protocol is completed.

It is most encouraging to see the list of known and respected professionals giving support to the protocol namely Neuro Paediatrician Ton Haagen MD from the Netherlands and Dr Caroline Ward director of the Autism Treatment Centre Ireland who has been known to us for some time and is a leading professional in the field of Autism and related ASD.

I trust that you will continue in your endeavours to make aware the medical and other communities, that Autism and related ASD is a treatable condition and can be so greatly improved by the Three Wells approach to recovery.

Once again many thanks for the opportunity to meet with you and your colleagues and we look forward to a long and fruitful association to help children worldwide.

Yours sincerely

Kathy Sinnott MEP

Member of European Committee on Environment, Public Health and Food Safety
Member of European Committee on Employment and Social Affairs
Vice President of European Parliament Disability Intergroup
Chairman of Hope Project, Administrators of European Autism Information System Project
